Virtual Career Talk: Technology Consulting Career At EY

Executive Summary:

This talk introduced career opportunities at EY Consulting such as SAP Consulting, Project Management, and Web Development. The session also highlighted EY's supportive culture, graduate programs, and the importance of certifications to boost employability which is perfect for first-year students aiming to start their tech careers at EY.

Introduction:

The Virtual Career Talk gave an overview of technology consulting at EY, featuring seven pillars of the technology consulting practices, which are Cybersecurity, Data and Analytics, Digital and Emerging Technology, Technology Solutions Delivery, Technology Transformation, EY Identity and SAP (System Application Product). We will look further into the technical roles in EY shared by three speakers.

Content:

The first speaker shared about her experience working in SAP which involved dealing with clients and work in a team to meet the clients requirement. As a SAP technical consultant, she works closely with her team to develop a system operation that meet the client's needs.

Next, we have the second speaker who talked about project management in technology consulting. He claimed that there's not much technical work involved but he mostly helps to manage the testing and system department in a team.

Finally we have the third speaker who explained about his work on web development. Similar with technical consultant , he have to build website for clients using programming languages like html, css, javascript, and some frameworks such as vue.js and node.js

Reflection:

We find this talk is quite motivating when the speakers mentioned about their career stories as well as the additional career counseling services that help graduates to explore their career interests in EY. We also gain insight about the process of graduate recruitement and internship recruitment with detailed explaination.
